The Ciba-Geigy site is an active chemical manufacturing facility located in East Lansing, Michigan. The site was originally identified by the Michigan Department of Natural Resources in the form of a Preliminary Assessment submitted to the U.S. EPA.

In 1982, Ciba-Geigy filed a Part A RCRA application with the U.S. EPA. RCRA status was confirmed in a telephone conversation with Michael Hoskins of RCRA, U.S. EPA Region 5.

Since this site is fully covered by a RCRA permit, it does not warrant any further involvement under CERCLA and an HRS score will not be determined.
